

Displate - Art on metal

Posted by Matt Coomber in [Collectibles](#), [Film News](#), [Ninja News](#) on 06 21st, 2014 | [no responses](#)

A name doing the rounds over at Hi-Def Ninja at the moment is 'Displate'

If you're an art lover, not just for things movie related, but anything art related then I highly suggest you check out the fantastic work over at [Displate.com](#), you're going to want to spend a lot of your money!!

What is Displate I hear you ask? Well, let me tell you.

Each Displate is a gallery quality print on thick 17,7" / 12,6" metal plate. Each Displate print is verified by the Production Master before being sent to you, the customer. Signature, unique series number and hologram added to the back of each plate for added authenticity & collectors value and a magnetic mounting system included.

Each plate is manufactured individually by the Displate team using handcrafting techniques to give it an absolutely unique character and unmatched quality making it an **original decorative piece and collector's delight.**

This is a place for the hologram which guarantees product authenticity

OF PRODUCTION

DISPLATE METAL POSTERS
MOUNTING INSTRUCTIONS

! READ THE INSTRUCTIONS CAREFULLY !
AND FOLLOW THEM STEP BY STEP !

1. Every Displate has one magnet added to mount it on smooth and flat surfaces

2. The surface should be clean, dry and degreased, so clean it with a wet cloth and wait until it surface dries up.

3. Take the magnet from the back of a poster and remove the protective foil, exposing the glue.

4. Stick the magnet with the glued side to the cleaned surface and press firmly with your hand for about 2 minutes.

5. Once confirmed, by trying to take the Displate off, that the poster is held strongly and will not fall, please place it so that the magnet is at the centre of the metal plate.

Displate MANUFACTURED FOR AN INDIVIDUAL ORDER

These look simply fantastic and make a refreshing change to the norm of posters and offers something a little different to that the mondo-like art prints. The finish on them is more of a matte finish with a slightly rough/sandy texture. The only downside that I did find with them, is that they are quite fragile and can bend fairly easily, particularly nearer the top and bottom of the Displates.

The colours on this are so rich and vivid, they look absolutely fantastic! On display they will certainly make heads turn!

If you fancy yourself as a budding artist, or have always wanted to see a print come to life that has never made it to fruition, well now YOU can create your own Displate art prints to sell via [Displate.com](https://displate.com). This is fantastic for the graphic designers out there who want to get their work realised, some of our own Hi-Def Ninja members have created their own portfolios on Displate.

Don't forget, right now you can enter for the chance to win a fantastic 'Drive' inspired Displate by clicking the following link - [CLICK ME](#). The Displate was kindly donated by Displate themselves, thanks guys!

It goes without saying that Displate's are certainly making a fantastic name for themselves and I will certainly be buying more!
